

FIDIUM FIBER IS COMING TO OAKLAND

Hello Citizens of Oakland,

Fidium Fiber internet service provider is planning on installing fiber optic lines throughout Oakland in the coming weeks. What does this mean for Oakland..... more construction! There will be more flaggers directing traffic throughout town roads when needed. Please respect their work, they are helping make Oakland better! This will give you another internet vendor to choose from. The map below shows where installation will happen (all colored areas are going to receive Fiber). They plan to start in the downtown area and work out of town from there. Spectrum will still be an option.
